INFUSION

I.V. CANNULA

General Specifications:

- Needle: Japanese siliconized stainless steel equipped with sharp triple facet bevel for smooth and easy venipuncture.
- Catheter: Radiopaque catheter is made of biocompatible material PTFE/FEP/PUR which confirms the
- Painless and smooth venipuncture due to smooth internal and external surfaces of the catheter. During fluoroscopy, the stripes absorb x-rays, making the catheter visible.
- Needle Hub: Has been designed with perfection in order to prevent any inconvenience during insertion of needle. Tight grip on hub provides extremely good support during insertion. Needle cover to prevent accidental damage to Needle & catheter
- Flashback chamber: Completely transparent flashback chamber for instant verification of venipuncture.
- Wings: The wings are flexible in order to deliver easy-going and protected fixation.
- Thread Stopper / Luer Lock: Specially designed in compliance with international standards to ensure no bleeding during the offline mode.

Medical Grade Paper for Primary packing complying with ISO 868 standard.

Sterile!!! Single Use!!! Non-Pyrogenic!!! Color coded body/port cap as per ISO Standard

Also Available:

I.V. Cannula with wings and without injection port

I.V. Cannula without port and without wings

I.V. Cannula without port and without wings

I.V. Cannula without port and without wings

3 Way Stop Cock

(Three Way Stop Cock with/without Extension tube)

Features and Benefits:

- 360° tap rotation.
- Red and blue pegs/stubs for arterial and venous line identification.
- Pressure tested to 5 bars.
- Minimum priming volume & low dead space.
- Polycarbonate material.
- Tube length available (cm): 10, 25, 50, 80, 100, 150, 200
- High Quality Kink Resistant tubing .

Infusion Set

Features and Benefits

- I.V. infusion set without airvented spike
- Approximately 20 drops/ml
- Common Features:
- Single use, sterile and non-pyrogenic.
- Available with Latex Tube/ Latex bulb
- Available with Latex Tube/ Latex bulb+ Butterfly wings
- Gravity Feed
- Transparent and flexible drip chamber for easy fluid adjustment and drop count 15-micron fluid filter in drip chamber
- Soft and kink resistant PVC tubing ensures accurate uniform flow rate without restriction
- Strong self-sealing latex free bulb
- Fine roller clamp enables easy, safe control and adjustment of fluid rates
- Tube length: 150 cm
- Tube dia - Int. » 3.0mm & Ext. » 4.1mm

Transfusion Set

(Blood Transfusion Set - Standard)

- BLOOD ADMINISTRATION SET [SINGLE CHAMBER], Latex Bulb/ Latex Tube.
- BLOOD ADMINISTRATION SET [DOUBLE CHAMBER], Latex Bulb/ Latex Tube.
- BLOOD DONOR SET WITH REGULATOR:
 - Super Smooth kink resistant tube.
 - Very efficient roller controller for accurate adjustment.
 - Needle size G: 16. extra sharp needle for smooth and effortless vein puncture.
 - Sterile / Disposable / Individual Packed.

Common Features:

- Clear, Transparent & flexible double drip chamber.
- Super Smooth kink resistant tube.
- Very efficient roller controller for accurate flow rate.
- Self sealing Latex / Latex Free bulb/Tube for easy flushing.
- Needle size G:18.
- Sterile / Disposable / Individual Packed

Scalp Vein Set

Features and Benefits:

- Designed to provide rapid venous access, for patient comfort during infusion.
- Siliconized and thin walled high quality needle for atraumatic insertion.
- Butterfly wings facilitate for better and easy fixation.
- Super smooth kink resistant tube.
- Color coded butterfly wings by size for easy identification.
- Sterile / Disposable / Individual Blister Packed.
- E.T.O. Sterile & Pyrogen Free.

Burette Set

- Strong and sharp spike for easy insertion in I. V. container.
- C - clamp for closing the fluid flow from I V Bottles when required volume of IV Fluid is filled in burette.
- Air inlet with bacteria barrier and injection port for extra medication is provided on top of burette.
- Flexible graduated burette with 150 ml or 100 ml marking at 1 ml stage and 10ml overflow limit.
- Shut off floater to prevent air embolism and indicate fluid level.
- Round collapsible drip chamber with micro drip to facilitate fluid level adjustment and drop count.
- Disc type fluid filter for filtration of fluids for any particulate matters.
- Kink resistant tubing with efficient roller controller for accurate flow control.
- Thick self sealing latex bulb for extra medication and flushing.

Insulin Syringe

An insulin syringe has three parts: a **needle**, a **barrel** and a **plunger**. Parts of an Insulin Syringe. The needle is short and thin. It is made of a special material that allows the needle to slide through the skin easily with less pain. It comes with a cap to cover and protect it before it is used.

Advanced Features:

- Short & thin Attached needle
- Sterile Single Use
- Easy to use
- Transparent & smooth sliding plunger
- Latex Free Elastoplast Gasket
- Luer Mount, with or without needle
- Available in Ribbon & Blister Pack

Hypodermic Needle

Features and Benefits:

- Non-toxic, Non-Pyrogenic, Sterile Single use
- Superior Quality Cannula and Grinding Technique insures a sharper point for easier injection.
- Gauge of needles may be identified easily by the color of hub manufactured as per ISO-6009.
- As compared to other regular needles, our needles have a broader bore that allows easy injection of liquids
- through thinner needles.
- Packing: Blister

Disposable Syringe

Sterile Hypodermic Syringes without Needle for Single use only (2pcs.)
Size: 1ml, 2ml, 3ml, 5ml, 10ml, 20ml, 50ml Without Needle of all sizes (Length and gauge).

Sterile Hypodermic Syringes with Needle for Single use only (3pcs.) Size: 1ml, 2ml, 3ml, 5ml, 10ml, 20ml, 50ml With Needle of all sizes (Length and gauge).

Common Features:

- Single Use Syringes are made of nontoxic, medical-grade polypropylene compatible with all medicines.
- Standard quality polypropylene used to ensure clear observation and smooth plunger movement
- Gasket is made from highly inert Thermo-Plastic Elastomer (TPE) in line with global standards
- Clear Barrel transparency to help the user observe the
- Sharp and clear Graduation marks in order to ensure Accurate Dosage of Medication.
- Luer slip or luer lock nozzle permits to adapt the needle hub.
- Sterilized by Ethylene Oxide Gas.

Spinal Needle

Features and Benefits:

- Suitable for Spinal anaesthesia
- Conical tip imparts superior tactile feedback
- High flow rate enables faster Cerebro Spinal Fluid (CSF) flashback
- Aggressive anesthetic distribution upon injection
- Clear polycarbonate hub offers easy visualization
- Available in Whitacre pencil point and Quincke point
- Sizes: – 16 G to 27 G x 3.5 Needle

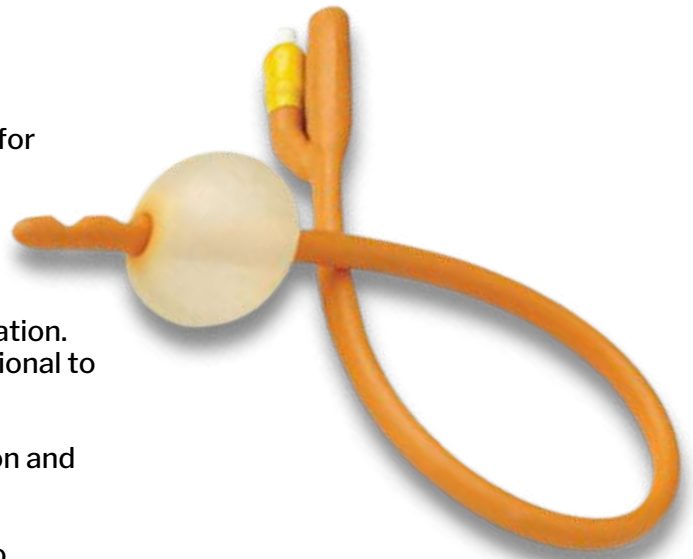

UROLOGY

Foley Balloon Catheter

Foley Balloon Catheter is a Urinary tract catheter used for short or long-term urine drainage

Features and Benefits:

- Catheter are made from Natural Latex Rubber.
- Siliconized smooth surface for non-traumatic intubation.
- Distal end is coned with super smooth eyes proportional to each other to provide non traumatic intubation.
- Provided with ultra-thin, highly elastic Balloon.
- Hard Non-Return Valve ensures trouble free inflation and deflation of Balloon.
- Also available in 100% Silicon elastomer.
- For sizes 16 to 26 Fr, smaller balloon capacity is also available on customer requirement.

Single use | Sterile | non-Pyrogenic

Male External Catheter

Male External Catheters, also commonly referred to as condom catheters or male catheters, are used by men to treat urinary incontinence.

This type of catheter consists of a flexible sheath that slides over the penis just like a condom.

Features

- Made of 100% natural latex
- Clear sheath for easy visual inspection of skin.
- Soft silicone and uniform adhesive for secure placement.
- Superior breathability for enhanced comfort and optimal skin integrity.
- Kink-resistant design to ensure continuous urine flow.
- Size: XL (35mm), L (30mm), M (25mm), S (20mm)
- Sterile EO

Package

- Individual Paper-plastic pack
- box of 50, Cartoon of 1000pcs

Urine Bag

(Urine Collection Bag)

Closed urine drainage system for short & long term use.

Features and Benefits:

- Urine Collecting Bag is used for short and long term urine drainage.
- 2000ml Urine Bag is manufactured from Medical grade soft PVC sheeting.
- Non Return Valve to avoid the back flow of Urine.
- Super smooth, 90cm kink resistance tube provided with
- Universal Connector for easy connection to the drainage catheter.
- Bag is graduated with easy-to-read scale.
- Also available with Top Bottom Outlet and Molded handle for easy handling and carrying facility.

Also Available:

- Urine Collection Bag with T-type Bottom Outlet and Sampling port
- Urine Collection Bag with NRV
- Urine Collection Bag with Bottom Outlet
- Urine Collection Bag with Top Outlet & Rod for Hanging

Packing:

- Sterile, Individually packed in Tear H.M pack.
- Master Carton of 400.
- Gross weight: 25.200kg
- Master Carton size: 750 x 305 x 650mm

Nelaton Catheter

Common Features:

- Closed coned distal end with two lateral eyes for efficient drainage.
- Smooth frozen surface tubing non-irritant to delicate mucous membranes of urethra.
- Color coded standard funnel shape connectors for quick size identification and secure connection.
- Manufactured from non-toxic, non-irritant medical grade PVC compatible with catheter lubricants.
- Catheter length 40 cm.
- Radio opaque line throughout the length for X-ray visualization.
- Single use | Sterile | non-Pyrogenic

***ANAESTHESIA
&
CRITICAL CARE***

Endotracheal Tube: Plain/Cuffed

(Endotracheal Tube Plain/Cuffed: Nasal/Oral)

- Endotracheal Tube is used to provide a direct and unimpeded airway for gases to pass to and from the lungs.
- Manufactured from non-toxic, non-irritant medical grade PVC Compound.
- Tip is suitable for both Nasal and Oral intubation.
- Radio opaque line provided throughout the length for X ray visualization.
- Proximal end is fitted with standard 15mm connector.

Common Features:

- Manufactured from siliconised non-toxic, non-irritant PVC kink resistant thermo-sensitive tube ensures tube potency for patient safety. Yet softness at body temperature to conform to the anatomy of the respiratory tract.
- Murphy eye has a polished smoothness ensuring a traumatic intubation and extubation.
- Kink resistant inflation tube ensures patient safety during cuff inflation and deflation.
- Standard 15mm connector provided at proximal end E.T.O
- Sterile & Pyrogen free

Packing:

- Sterile, individually packed in peelable pouch pack.
- Box of 10; Master Carton of 100.
- Gross weight: 2.300kg
- Master Carton size: 570 x 320 x 340mm

Sizes:

- 2.5mm, 3.0mm, 3.5mm, 4.0mm, 4.5mm, 5.0mm, 5.5mm, 6.0mm, 6.5mm, 7.0mm, 7.5mm, 8.0mm, 8.5mm, 9.0mm, 9.5mm, 10mm

Silicone Face Mask

We supply leak proof transparent Silicone Face Mask that is convenient and practical. Our company's operational principal is to deliver value to clients and hence, we supply the best quality and most practical respiratory care. We ensure that our products are of reliable quality, reasonable price and they deliver remarkable service. Our silicone face mask can also be designed according to particular patient's requirement.

Features:

- Effective grip, Anti-static property, Comfortable to wear, Easily fits on the face, Easier to clean and long lasting.

Oxygen Mask

Features and Benefits:

- Soft kink resistant star lumen anti crush tube length 200 cm.
- Soft, large, anatomical shaped face mask fits comfortably over face.
- Nose clip for easy adjustment over patient nose .
- Rotating connector for Patient comfort.
- Made from Non-toxic, non-irritant, bio-compatible, medical grade PVC.
- Elastic strap provided to position the mask properly.

Nebulizer Mask

Features and Benefits:

- Soft kink resistant star lumen anti crush tube length 200 cm.
- Soft, large, anatomical shaped face mask fits comfortably over face.
- Nose clip for easy adjustment over patient nose .
- Rotating connector for Patient comfort.
- Made from Non-toxic, non-irritant, bio-compatible, medical grade PVC.
- Elastic strap provided to position the mask properly.

Resuscitator

Features and Benefits:

- Complete kit has star lumen oxygen tube, reservoir bag, silicon mask, resuscitator bag and pressure release valve.
- Good recoiling property after pressing during resuscitation.
- 360° rotation of connectors between patient & resuscitation bag.
- Made from 100% silicon, autoclavable.

Contents per Kit:

- 1 Silicon resuscitator Bag, 1 Silicon Mask.
- 1 Star Lumen tube, 1 Reservoir Bag (PVC).

Nasal Oxygen Cannula

Intended Use For the direct oxygen delivery to the patient's Naso Pharynx.

Features and Benefits:

- Soft, frosted, kink resistant tube open at distal end.
- Open distal tip with multiple perforations for even distribution of oxygen.
- Color coded connector

Suction Catheter

Features and Benefits:

- Manufactured from non-toxic, non-irritant medical grade PVC.
- Open distal end with one smoothly finished lateral eye.
- Frozen/clear surface of tubing along with atraumatic eyes for smooth intubations. Graduated at every cm starting from 5 cm for correct positioning of catheter.
- Funnel shape Color Coded Connector for instant size identification & safe connection with suction m/c.
- Length: 50 cm.
- Sizes 6-24 FG.
- Straight peel open pack.

Heat Moisture Exchange Filter / HME Filter

- The Heat and Exchange Moisturizers Filter (HMEF) is used in mechanically ventilated patients intended to help for preventing complications due to "Drying of the Respiratory mucosa, such as mucus plugging and endotracheal tube (ETT) occlusion. HMEF is one type of commercial humidification systems.
- Moisture Output: 32 mg H₂O/L.
- Filtration Efficiency: 99.99%.
- Tidal Volume Range: 150-1500 millilitre.
- Connections: 22M/15F – 22F/15M.
- Gas Monitoring Port: Yes.

Catheter Mount

The catheter mount is used as an intermediary connection between the patient and the breathing system. These tubes are made of a special flexible co-polymer. These tubes have a minimal compliance with low dead space volume. The catheter mount is fitted with a double swivel connector and flexible tubing.

Advanced Features:

- Provided with Suction & Bronchoscopy Ports
- Compatible with all Breathing and Ventilator circuits
- Double swivel connector and flexible tubing provides mobility and flexibility to the patient end of the circuit
- The catheter mount is fitted with a double swivel connector
- The tubes are made of a special flexible co-polymer and have a minimal compliance with low dead space volume
- Each catheter mount has a 22 mm female / 15 mm male end to connect to the breathing system end 15 mm female end to connect to the endotracheal tube or laryngeal mask

Tracheostomy Tube: Plain/Cuffed

A Tracheostomy (trach) tube is a curved tube that is inserted into a tracheostomy stoma (the hole made in the neck and windpipe (Trachea)).

Features:

- Available in: Cuffed and Plain
- Used to maintain a patent airway through tracheostomy and mechanically ventilate patients
- Made from non-toxic, non-irritant, medical grade clear PVC
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature
- Lockable obturator with facility to insert guide wires to facilitate intubation using the widely accepted Seldinger guide wire technique
- Kink resistant inflation tube to ensure patient safety during cuff inflation and deflation
- Radio opaque line and markings provided to facilitate identification of tube position
- Universal 15 mm connector at proximal end
- E.T.O Sterile and Pyrogen free. For single patient use.

Suction Catheter Closed System

Suction Catheter-Closed System is used to maintain ventilation and oxygen therapy while suctioning in mechanically ventilated patients. This catheter is a part of ventilator circuit with no need to disconnect the ventilator. It reduces the risk for contamination from outside pathogens and minimizes the risk of Ventilator Associated Pneumonia (VAP).

Features:

- Made from non-toxic, medical grade PVC.
- Kit comes with 3 easily replaceable catheters, minimizing the need to replace entire suction system every 24-72 hours.
- Catheter with lateral eyes, smooth tip and depth markings for maximum patient comfort.
- MDI port provides an effective, quick and convenient way of drug delivery.
- Irrigation port with one way valve allows lavage and irrigation of the suction catheter.
- On/off valve allows suction catheter tip to be isolated and creates an enclosed cleaning chamber.
- Transparent connectors and durable sleeve facilitates catheter manipulation and prevents infiltration of blood and sputum.

**SURGERY
&
WOUND DRAINAGE**

Closed Wound Suction Set

Features and Benefits:

- Two Redon drain tube provided with RO line and smooth eyes for two check & discuss drainage in case of need.
- Depending on need different sizes of Redon Drain tube and Trocar available.
- Leak proof cap and single step pinch clamp for easy and one hand operation.
- Main connecting tube has been equipped with color coded Y connector to connect compatible redon tube.

Complete Kit Contains:

- 1 Bellow Container, 1 Allen Needle.
- 2 Redon drain tube, 1 Connecting tube.

Umbilical Catheter

Features and Benefits:

- Umbilical Catheter is used to access the umbilical vessels of pre-matured infants or newly born babies.
- Manufactured from non-toxic, medical grade PVC.
- Smooth round tip for non-traumatic insertion and well finished surface facilitates smooth passage of catheter in the vein.
- Radio opaque line provided throughout the tube for checking the position of the catheter radiologically.
- Marking is provided at every cm to ascertain depth of insertion.
- Proximal end of catheter is provided with Luer Female connector for easy connection to the I.V. Therapy equipment.

Umbilical Cord Clamp

Features and Benefits:

- Provided with secure and leak proof jaws to ensure proper clamping.
- Provided with non-reopenable locks to avoid any accidental opening of clamp.
- Grooved clamping area to prevent slipping of the umbilical cord.
- Free from any sharp edges, flash or burr.
- Manufactured from non-toxic, medical grade polymer.
- Finger grip is provided to facilitate easy holding and locking of the clamp.

Thoracic Drainage Catheter

(Straight/Angled)

Features and Benefits:

- Manufactured from non-toxic, medical grade PVC compound.
- Smooth and round open distal end.
- Catheter is provided with large smooth eyes for maximum drainage.
- Catheter is marked at every 2 cm from the last eye to ascertain the depth of placement.
- Proximal end of the catheter is fitted with Taper tongue connector to provide better forceps grip and smooth penetration.
- Also available in right angle.

Yankaur Suction Set

Features and Benefits:

- Suitable for pre-operative removal of secretion and body fluids.
- Cut to fit funnel connector to suit different suction pump lines at proximal end. Also available with Kapkon and Conical connector at proximal end.
- Yankur Handle is open end with 4 lateral eyes to withstand negative pressure and ensures continuous and easy suction of fluid.
- Yankaur Handle available in standard or crown tip with or without Vaccum thumb control.

Manual Vacuum Aspiration (MVA Kit)

MTP Syringe / MVA Kit
DOUBLE VALVE / SINGLE VALVE

- MTP Syringe is used for Manual Aspiration procedure. (Medical Termination of Pregnancy)
- Manufactured from polypropylene polymer.
- Specially designed Syringe to apply suction during surgical abortion procedure.
- Available in Single Valve and Double Valve Syringe.
- MTP Syringe provides High Vacuum Suction during procedure.

Scalpel

Available in pattern numbers
10, 10A, 11, 11P, 12, 12B/12D, 14, 15, 15C,
15T, 16, 18, 19, 20, 21, 22, 23, 24, 25.

Supported sterile, Stainless Steel blade
tampered with plastic handle.
Protected by polythene blade guard.
Individually packed in peel pack medical
grade paper.
10 pcs. in a box.

Surgical Blades

Surgical Blades are used for cutting skin and tissues. There are different types of Surgical blades. We differentiate surgical blades by Surgical Blades shape and size. Surgical blades are made with stainless steel or carbon steel.

Surgical Blades are Available in both stainless and carbon steel Numbers 10, 10A, 11, 11P, 12, 12B/ 12D, 14, 15, 15T, 15C & 16 fit handle numbers 3,3L, 5,7 & 9. Numbers 18, 19, 20, 21, 22, 23, 24 & 25 fit handle numbers 4, 4L & 6 Individually V.C.I paper and foil packed. Supplied sterile and non sterile, in box packing of 100.

Delivery Kit

- Complete solution for clinicians in normal and Caesarian delivery procedures
- Ensures safe childbirth in case of unassisted deliveries in rural areas
- Standardized / Customized kits available

Content options for customizable kits:

- Gauze Swab
- Abdominal Sponge (X-Ray op.)
- Umbilical Cord Clamp
- Umbilical Cord Ties
- Umbilical Tabular band (Elastic)
- Umbilical Scissor
- Sutures
- Forceps
- Needle Holder
- Mucus Extractor with Adopter
- Syringe (20 ml)
- Baby Wipe (60×60)
- Baby Diaper
- Baby Blanket
- Baby Garment
- Feeding Bottle
- Maternity Gown
- Maternity Pads
- Maternity Mesh Panty
- Surgeon Caps
- Surgeon Gown
- Surgeon Gloves
- Lignocaine Gel
- Povidone Iodine Solutions
- Plastic Tray
- Applicator Stick
- Perineal Sheet with Legging
- Maternity Drape Sheet
- Under Pad with Collecting Bag
- Instruction Sheet
- Measuring Tape
- Dimension Detail Sheet
- Pen
- ID Band (Pediatric)
- ID Band Adult
- Waste Bag

GASTROENTEROLOGY

Ryle Tube

- Made from non-toxic, medical grade P.V.C. material.
- Also available in medical grade 100% Silicon material

Features and Benefits:

- X-Ray line facilitates detection during passage to duodenum.
- Soft rounded distal end with solid RO material sealed into the tube, to assist the passage of the tube during intubation.
- Four lateral eyes are provided for efficient aspiration and administration.
- Marked at 500mm, 600mm & 700mm from the tip for proper placement.
- Smooth surface for easy insertion.
- Colour coded Universal funnel shape connector with cap for easy identification of sizes provided at proximal end.

Kehr's "T" Tube

Features and Benefits:

- Kehr's "T" tube is used for short term post operative drainage of common bile duct.
- Manufactured from soft non-toxic, medical grade PVC compound.
- Radio opaque line provided throughout the tube for X-ray visualization.
- Super smooth tube surface prevent clogging.
- Available in natural and latex rubber.

Infant Feeding Tube

Features and Benefits:

- Manufactured from non toxic, medical grade PVC compound.
- Distal end is smooth coned shape for non-traumatic intubation.
- Two lateral eyes for efficient drainage.
- The tube is marked at 20 cm from the distal end for accurate placement into the abdomen.
- Radio opaque line provided throughout the tube for X-ray visualization.
- Proximal end is provided with luer mount for connection with feeding device.

Salem Sump tube

- It is used to prevent the accumulation of gastric secretions and air.
- Made from non-toxic medical grade PVC.
- Double lumen tube throughout the length provides air vent when the stomach has been evacuated of accumulated liquid, air or small particulate matter.
- Coned distal end with ten lateral eyes for faster drainage.
- Fitted with universal funnel connector along with double taper connector at proximal end for easy extension.
- It has markings at 45, 55, 65 and 75 cm and radio opaque line for accurate placement.

- Length
 - Effective Length: 119cm
 - Total Length: 122cm
- Sizes in FG
 - 12, 14, 16, 18, 20

Colostomy Bag

Features and Benefits:

- Colostomy bag is designed for closed colostomy management.
- Made up of medical grade PVC material.
- Does not macerate the skin as flange is with hypo allergic adhesive.
- The hole opening can be increased as per requirement

Levin's Tube/Rectal Catheter

Features and Benefits:

- Levin's tube is used for Gastro intestinal drainage.
- Manufactured from non toxic, medical grade PVC compound.
- Distal end is coned with four lateral eyes for efficient drainage.
- The tube is marked at 45, 55, 65 and 75cm from the distal end for accurate placement into the abdomen.
- Radio opaque line provided throughout the tube for checking the position of the catheter radiologically.
- Proximal end is provided with Universal Funnel Connector for easy extension.
- Length
 - Effective Length: 119cm
 - Total Length: 122cm

Packing:

- Sterile, Individually packed in peelable pouch pack.
- Box of 50; Master Carton of 500
- Gross weight: 16.500kg
- Master Carton size: 790 x 475 x 275mm

**DISPOSABLE
WEARS**

Medical Gloves

Nitrile, Latex, Examination, Elbow Gloves

Made with natural rubber, our surgical gloves adopt an ergonomic design that guarantees the right fit and comfort while wearing. Each glove is sterilized by ethylene oxide, keeping it safe and purified before use.

Pitted surface provides a greater grip
Available in powder and powder-free varieties

Used for preventing cross-contamination during surgical operations

DIAGNOSTIC

Pregnancy Test Kit

The Clearsign HCG pregnancy test is the one-step test for high sensitivity detection of HCG in urine. It provides rapid, reliable results in 3 minutes. It has the ability to detect pregnancy on the day of a missed period and has an inbuilt procedural control for confirmation that the test has been performed correctly

***SURGICAL
SUTURES***

Polyglactin 910 Suture

Polyglactin 910 suture is most widely used braided and coated synthetic absorbable suture in the world. On account of its superior properties, this suture has replaced catgut sutures in most applications

Polyglycolic Acid Sutures

PGA is an ideal and time tested synthetic absorbable suture, widely used by surgeons all over the world. PGA's superior features over catgut are predictable absorption, outstanding tensile strength, in-vivo inertness and excellent handling properties.

Poliglecaprone 25 Sutures

Poliglecaprone 25 Sutures is a monofilament synthetic absorbable sutures which is a copolymer of Glycolide and Caprolactone. This is a Improved synthetic suture acclaimed by most surgeons.

Monofilament Polydioxanone Sutures

Monofilament Polydioxanone Sutures provides wound support for longer period as compared to other synthetic absorbable sutures. This Suture offers far superior tensile strength.

Catgut Sutures

Catgut Plain and Chromic Sutures

Most widely used in the surgery. Good tensile strength. Excellent handling property & easy to knot, even in depth. Twisted multifilament with virtually monofilament finish.

Monofilament Polypropylene Sutures

Monofilament suture with excellent tensile strength and reasonable elasticity. Its pliable smooth surface makes it excellent for easy passage

Monofilament Polyamide Sutures

Being monofilament, Linex is remarkably smooth and gives excellent knot security. Possesses good tensile strength. Easy removal with no tissue adherence

Silk Sutures

Most widely used. Excellent handling characteristics. Good knot security. Entwined thread from silkworm larva. Treated with silicone or wax to give strength and smooth surface.

OPHTHALMIC

OPHTHALMIC SOLUTIONS

Ophthalmic Sutures

Mico surgical Knife

Intraocular Lenses

**SPECIALIZED
SEGMENT**

EPIDURAL Kit

Kit contains Epidural Needle and Epidural Catheter of Corresponding size.

- Specifically designed kink resistant yet structurally strong catheter with flexible tip making catheter placement convenient.
- Risk of inadvertent dura puncture or vessel rupture are markedly reduced with soft and flexible catheter tip.
- The uniquely designed coil reinforced body is the mainstay of its structural strength and makes the catheter non collapsible for long periods. Smooth exterior and inner helix platform makes maneuverability easy and imparts radio opaque property to the catheter.
- Calibrated catheter depth marking make the placement exact and the colored catheter tip makes intact catheter depth marking make the placement exact and the colored catheter tip makes
- Each 10 mm, beginning at 10 mm from the tip, up to 250 mm.
- 2, 3, 4, 5 points, 2.5 mm each are located at 100, 150, 200, 250 mm from the tip respectively.
- Non-collapsing holes near the tip makes drug dispersion uniform.
- Also contains specially designed filter disc with screwed connection for easy fit.

Central Venous Catheter Kit

The CVC is designed for placement in the Jugular Vein in critically ill patients. It's designed for long term vascular access. For central veins catheterization (subclavian, Jugular Veins) according to Seldinger method. A traumatic metallic conductor with a J-shaped tip Prevents the vessel wall from injury.

SET CONTAINS

- Central Venous Catheter
- 5ml Guiding Syringe
- SS Guidewire with Advancer "J" Tip 50cm
- Patient Identification Sticker
- Wound Dressing Pad
- Vessel Dilators
- 18GA - 7cm Introducer Needle
- Suture Wing
- Injection Cap
- Scalpel #11

Blood Bags & Blood Collection Tubes

- Single Blood Bag - 250 / 350 / 450 / 500 ml. containing of 35 / 49 / 63 / 70 ml. of CPDA / CPDA-1 anticoagulant solution.
- DEHP plasticized PVC, collapsible, non-vented, sterile container complete with collecting tube in a closed system.
- Sterile non-pyrogenic, non-toxic, non-hemolytic, biocompatible material.
- Inner bag maintains the sterility.
- Slits on both sides to accommodate 5-10 ml volume test tube & at the bottom of bag to hang the blood bag during transfusion.
